COGNITION

International Journal of Cognitive Science

Aims and Scope

Cognition is an international journal publishing theoretical and experimental papers on the study of mind. It covers a wide variety of subjects concerning all the different aspects of cognition, ranging from biological and experimental studies to formal analysis. Contributions from the fields of psychology, linguistics, computer science, neuroscience, mathematics, ethology and philosophy can find a place in this journal, provided that they have some bearing on the functioning of the mind. In addition, the journal serves as a forum for discussion of social and political aspects of cognitive science.

Contributions

- Theoretical and experimental papers on the study of the mind
- Short experimental reports, notes and discussions on current trends in scientific, social or ethical matters (contributions must be written in English, not exceeding 1,000 words, including tables and graphs)
- Book Reviews – The Journal welcomes book reviews of just-published books or of books that should again be brought to the attention of the readers. (Books in English offered for review should be sent to Dr Mehler.)
- Letters to the editor

Submissions

Contributions should be submitted to either Jacques Mehler, Laboratoire de Sciences Cognitives et Psycholinguistique, 54, Boulevard Raspail, 75006 Paris, France – e-mail: cognitio@lscp.msh_paris.fr, fax: +331 45449835 – or Cognition c/o John Tagler, Elsevier Science Inc., 655 Avenue of the Americas, New York, NY 10010, USA.

Each submission should include one original and three copies of the full manuscript. Upon full acceptance of the article for publication, authors will be encouraged to submit the final revised version on computer disk.

Information for Authors

Papers will be selected on the basis of their scientific quality. A paper's theoretical relevance to cognition, overall soundness of argument, and degree of empirical motivation, especially from converging sources, are more important than its adherence to specific methodological principles. The paper should present new and previously unpublished material, should be suited to the character of the Journal, and should describe work done and methods used in a clear and explicit manner (allowing reproduction of the methods by others). No specific length is prescribed for contributions, but authors must confine themselves to the minimum required by the subject matter, and the same applies to tables and footnotes. All typescripts should be written in English.

Papers will be accepted or rejected on the advice of at least two reviewers. A third reviewer will be consulted whenever a basic disagreement occurs.

Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere. Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Format and style of manuscripts should conform to the conventions specified in the *Publication Manual of the American Psychological Association* (1200 Seventeenth Street, N.W., Washington, DC 20036; 1983 Revision).

Illustrations (figures) must be supplied in professional-quality finished form, ready for reproduction. Original artwork is preferred to glossy prints, and photographs should be avoided if possible. Pages 94–105 of the *Publication Manual* give detailed instructions on the proper preparation of the drawings, including information on letter sizing and reduction factors. Illustrations of an insufficient quality may be redrawn by the publisher at the author's expense.

Offprints. Of each article 50 offprints will be supplied free of charge to the authors. Extra offprints can be ordered from the publisher when returning the corrected proofs at prices shown on the offprint order form that accompanies the proofs.

Proofs. All questions arising after acceptance of the manuscript, especially those relating to proofs, should be directed to Elsevier Editorial Services, Mayfield House, 256 Banbury Road, Oxford OX2 7DH, UK, tel. (+44) (0) 1865 314900, fax (+44) (0) 1865 314990.

Abstracting Organizations

Articles in this journal will be indexed and abstracted in Biological Abstracts/BIOSIS PREVIEWS, Child Development Abstracts and Bibliography, Computer Abstracts, Current Contents: Social & Behavioral Sciences, EIC Intelligence, Linguistic Inquiry, Psychological Abstracts/PsycINFO, Social Sciences Citation Index, Sociological Abstracts.
